Green Smoothie

IMMUNE, DIGESTIVE AND ENERGY SUPPORT

Prep time: 5 minutes

Cooking time: none

Total time: 5 minutes

Allergens: celery

Smoothie

- Gluten-free
- Dairy-free
- Vegan

Serving:
1 large portion
(approx. 400 ml)

INGREDIENTS

- 2 celery stalks—cut into quarters
- ½ small cucumber—cut into quarters)
- 30 g spinach
- 20 g kale—remove stems, roughly chopped
- 100 g pineapple- 2-inch cubes
- ½ lemon—squeezed
- 1-inch fresh ginger—peeled, sliced
- 1 tbsp ground flaxseeds
- 150 ml filtered water

PREPARATION

1. Wash all ingredients well with cold water.
2. Place water followed by ingredients inside a blender and blend until smooth.
3. Add more water if you prefer a smoother, lighter texture.
4. Transfer the smoothie into a glass and enjoy!

This nutritious green smoothie is a great way to kickstart your day. Add an extra protein boost with a spoonful of hemp, chia, nut* or seed* butter. Allow yourself to get creative with whatever you have in your pantry that can add depth, flavour and most importantly, nutrients!

*Allergen

RECIPE HEALTH BENEFITS

- Contains high amounts of fibre that promote healthy digestion and supports elimination pathways.
- Flaxseeds are rich in omega 3 (healthy fats) and great source of protein.
- Pineapples contain bromelain which is a digestive enzyme that has anti-inflammatory properties.
- Rich in antioxidants, phytochemicals, vitamins, and minerals.
- Contains immune supportive nutrients such as vitamins (A, C, E, D) and minerals (magnesium, zinc, iron, and selenium).
- Ginger aids with digestive discomfort and can decrease nausea and vomiting.

TIPS

- **It is best to consume the smoothie just after making** it to avoid nutrient loss. However smoothies will keep fresh for up to 12 hours in an airtight glass container in the fridge.
- **Pineapples and lemons contain numerous nutritional benefits** though very acidic and can cause irritation if you have mouth soreness or indigestion/reflux. Simply swap out for a low acid fruit such as mangoes or melon (*caution high sugar content in mangoes).
- **For diabetics**, try removing the fruit from the recipe and replacing with another green vegetable or a fruit that is low in sugar such as avocado or berries.
- **If you would like to increase your electrolyte levels**, add coconut water which contains magnesium, potassium, and sodium..
- **Avoid adding grapefruit to your smoothie recipe** as it can interact with the metabolism of certain medications.
- **Choose organic fruit and vegetables** if accessible. If not, peel when possible and wash well.

Green smoothies are the **quickest** and **easiest way** to pack in your nutrients without having to put mountains of greens on your plate should your appetite be reduced. They also produce very little waste.
